

McCain and Lieberman Climate Stewardship Act introduced last week, for which I am a cosponsor. This bill would create a domestic market-based cap-and-trade system to reduce carbon dioxide emissions. Again, the ICCT Taskforce recommends that all developed countries introduce national mandatory cap-and-trade systems for carbon emissions, and to construct them to allow for their future integration into a single global market.

The Feinstein-Snowe resolution includes other goals of the ICCT taskforce, encouraging the U.S. to carry out reasonable and responsible actions to ensure significant and meaningful reductions in emissions of man-made greenhouse gases, particularly through generating climate-friendly technologies to promote sustained economic growth. Importantly, like the ICCT Report, it also calls for international negotiations under the United Nations Framework on Climate Change, UNFCCC, which was ratified by the U.S. Senate in 1992, and this should be done for the post-Kyoto period, or after 2012.

Mr. President, even with the Kyoto Protocol going into effect, it is obvious that new ideas for securing international cooperation are necessary as we cannot get to the heart of this global problem without the world's major economies at the table. We have a choice between an even greater treacherous path of increased environmental damage and economic harm, or an upward path to a better future for our planet, and enhanced competitiveness for our industries. Again, the ICCT report addresses this, calling for the formation of a G8 plus Climate Group I between the G8 and the major developing countries to pursue technology agreements and related initiatives that will truly lead to large global emissions reductions.

To mitigate further losses, the U.S. should actively engage in the discussions at the upcoming G8 Summit, offering viable recommendations and realistic goals for further domestic and international emissions reductions. The U.S. can ensure the protection of the competitiveness of U.S. industry while at the same time joining with others to take positive action to tackle global warming. The U.S. has the opportunity to re-engage as a world leader, serving as a model for developing nations such as China and India, whose unchecked CO₂ emissions will soon rival those of the United States.

The urgency is clear as climate change is no longer an abstract concept. Polar ice caps are melting. Sea levels are rising. And the earth's temperature is undeniably climbing—with ten of the warmest years on record since 1990. Documented by countless scientific studies, the world bears witness to the effects of climate change. A result of increases in manmade carbon

dioxide emissions, climate change appears to be impacting the planet's weather patterns, resulting in more severe, sustained storm systems, floods, heat waves, and droughts.

Earlier this month, an international conference of scientists recommended that action must be taken now to reduce emissions in order to stabilize concentrations of greenhouse gasses in the atmosphere. Their report warned that a delay of even five years could be significant. And, beyond environmental devastation, climate change dictates serious economic and human costs.

Mr. President, it has been a privilege to work on this Senate Joint Resolution with Senator FEINSTEIN of California, and I urge my colleagues to give our resolution full consideration as the rest of the developed world strives not only to protect today's environment and economies but to bequeath a healthy and sustainable planet to future generations. I encourage my colleagues to support this resolution.●

CONGRATULATING THE 652D ENGINEER COMPANY

● Mr. FEINGOLD. Mr. President, I congratulate the Army Reserve's 652d Engineer Company from Ellsworth, WI, for winning the 2004 Department of Defense, DOD, Reserve Family Readiness Award. This award is given by DOD to only one unit from each Reserve component in recognition of their exceptional family support program.

Our men and women in uniform continue to serve courageously around the world and make great sacrifices to do so. We owe these folks a great debt of gratitude. However, they are not alone in making these sacrifices—their families, too, bear a great burden. The families must not only deal with the emotional toll of having their loved ones serving in a dangerous area, they must also deal with the daily tasks that keep a family functioning. The toll can be especially great on Reserve Component families who have to deal with all sorts of challenges when their loved ones transition to active duty.

The members of the 652d Engineer Company and their families personally know about sacrifice. Four of its members were killed in action during Operation Iraqi Freedom, including 2 on Christmas Day 2003, and 20 received Purple Heart Medals. The 652d Engineer Company's Family Readiness Group, FRG, provided crucial support to the families of these soldiers. We must also remember the confusion and uncertainty that was particularly acute with the early deployments. The FRG was key in helping families navigate through the many pre- and post-deployment issues. Their excellent work was an essential factor in allowing the 652d Engineer Company to carry out its mission.

So, Mr. President, I want to thank the 652d Engineer Company and the

FRG for their service and to congratulate them again on receiving this award and on a job well done.●

CELEBRATING BLACK HISTORY MONTH

● Mrs. FEINSTEIN. Mr. President, I rise today to commemorate Black History Month.

This month celebrates the accomplishments of African Americans, honors the tremendous sacrifices they have made to promote the strength of our great nation, and recognizes their enormous contributions to our diverse American culture.

Black History Month is a time to reflect on the accomplishments and heroes of the past, as well as a time to salute the leaders of today.

The first Negro History Week took place in 1926 and was coordinated by Dr. Carter G. Woodson, the son of former slaves, the second African American ever to earn a PhD from Harvard University, and founder of the *Journal of Negro History*. Dr. Woodson's goal was to raise awareness of and funding for the study of black culture and history in America.

The second week of February was chosen for Negro History Week to honor the birthdays of President Abraham Lincoln, who promulgated the Emancipation Proclamation, and Frederick Douglass, one of the most prominent black abolitionists.

In 1972 Negro History Week was changed to Black History Week to reflect the changing social attitudes toward race in America, and in 1976 February officially became Black History Month.

The theme of this year's Black History Month is "The Niagara Movement: Black Protest Reborn, 1905–2005."

The Niagara Movement was the forerunner to the National Association for the Advancement of Colored People. It was founded in 1905 by a group of black intellectuals, led by W.E.B. DuBois, John Hope, and William Monroe Trotter, who called for full civil liberties, an end to racial discrimination, and recognition of human brotherhood.

In my home State of California, you will find many African American leaders who have contributed to the legacy set forth by the Niagara Movement. They are true humanitarians and epitomize the ideals of the civil rights movement.

I would first like to recognize Roy Willis, a resident of my hometown of San Francisco, for his 35 years of history-making contributions to California and over 45 years of service to our nation as a civil rights pioneer.

In 1958, Roy Willis ended racial segregation at the University of Virginia by becoming its first African American student.

In 1967, he went on to Harvard Business School to earn his MBA. While at
